

OUR MANAGEMENT PHILOSOPHY

GROWING TOGETHER WITH OUR CUSTOMERS

Our company has been sharing this philosophy as a starting point for all of our business activities since its formation. We believe that the creation and provision of new values based on customers' perspectives will strengthen the relationship of mutual trust between our customers and the Amada Group, and become a source of mutual development.

CONTRIBUTE TO THE INTERNATIONAL COMMUNITY THROUGH OUR BUSINESS

Our company recognizes that contributing to "manufacturing" conducted by our customers throughout the world leads to the development not only of local communities, but also the international community as a whole, and we conduct our business activities with the aim of providing the highest quality of solutions in each market around the world by optimally distributing our group's management resources.

DEVELOP HUMAN RESOURCES WHO PURSUE CREATIVE AND CHALLENGING ACTIVITIES

Rather than being content with the present situation, we are constantly in search of new and better ideas to put into action in order to improve and enhance our business activities. This is the Amada Group's basic philosophy of human resources development, and we believe that Amada's unique corporate culture will be further developed by continuing to practice this philosophy.

CONDUCT SOUND CORPORATE ACTIVITIES BASED ON HIGH ETHICS AND FAIRNESS

We promote transparency and we comply with regulations in the Amada Group's management and in all aspects of its business activities, and strive to further enhance its corporate value while conducting sound activities.

TAKE GOOD CARE OF PEOPLE AND THE EARTH'S ENVIRONMENT

By treating the Amada Group's stakeholders (such as shareholders, customers, business partners, employees and local residents) and the global environment with respect, we strive to continue to be a good company for both people and the earth.

CO., LTD.

SAWING TECHNOLOGY

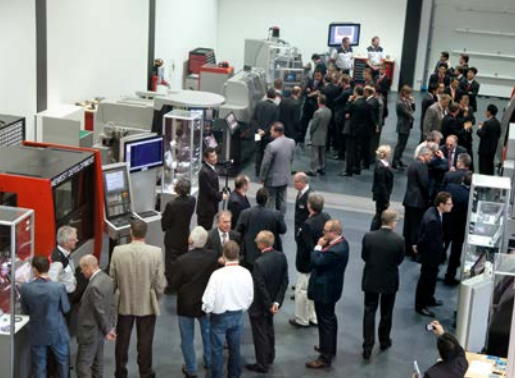

AMADA has the unique advantage of producing both band saw machines as well as band saw blades. This advantage results in a continuous development of new and optimized products. The AMADA factory in Ternitz, Austria develop and produce bandsaw blades especially for the European market.

MILLING TECHNOLOGY

The production advantages offered by AMADA milling technologies are utilized in the tool steel industry as well as in the manufacturing of all supply parts for the engineering, energy, transportation, automotive, aerospace sectors. AMADA offers productive twin-headed milling machines for high-precise machining of plate material and big size milling head machines, allowing plates with big width and length to be milled in one or few passes.

GRINDING TECHNOLOGY

AMADA is one of the market leaders for optical profile grinding and high precision surface and profile grinding. With the combination of the extensive technologies from Wasino, Petewe, Doebeli and Profiltec all under the ownership of AMADA, we will lead profile grinding into new dimensions.

OPTIONS / AUTOMATISATION

Although the AMADA machines with standard accessories are perfectly equipped for economic production, it is still possible to increase efficiency with customized solutions. Those solutions are based on practiceproven components which make it possible to ensure short-term availability and maximum process security.

PARTS / FLUIDS

To guarantee the best replacement part supply AMADA Machine Tools Europe operate a centralized spare parts storage at Haan near to Düsseldorf/Germany. Consumables and frequently used spare parts are stored also at local storages at Italy and France to guarantee a good response time. With AMADA MACHINE TOOLS original spare parts and fluids, you will reach maximum reliability.

SERVICE

AMADA MACHINE TOOLS EUROPE provides tailor-made service support for the complete operating life of your grinding, milling and sawing machines. Our proficient service staff will help you to use your machine in the most efficient manner. Our comprehensive service network guarantees fast availability of a service technician and reduced idle times of your machine tool.

APPLICATION ENGINEERING

AMADA MACHINE TOOLS EUROPE supports the customer throughout the whole investment decision-making process. In our Technical Centre, we are doing test cuts, calculate the job times and costs, we discuss the process analysis results with our customers. For qualified bandsaw blade users we offer on request on site application tests.

TECHNICAL CENTERS

The master plan for the AMADA Technical Centres is to create a unique atmosphere for all visitors to the very highest standard, where the latest manufacturing technology may be discussed and demonstrated. The latest technology in each product group can be shown here 'live'. Customers' requests and requirements can be better analysed, in order to find, jointly, the individual optimum solutions.

ENVIROMENTAL AWARENESS

AMADA has developed a long-term environmental plan „AMADA Green Action“ to the ongoing promotion and preservation of the environment.

In the development of new products, reduction of energy and resources are taken into account. New production facilities, such as the plant in Toki, will be built according to these guidelines and operate under strict compliance with the conservation of resources.

QUALITY AND ENVIROMENTAL MANAGEMENT

Already since 1983, AMADA has been carrying out production based on the "AMADA Group Policy of Quality Insurance" and has been working daily on achieving further progress in the performance and quality of its products and on consistently optimising production processes. AMADA machines, tools and endless saw blades are produced in a network of global production sites throughout Japan, Europe, USA, China and Taiwan.

ISO Certifications: The production center in Fujinomia is certified to ISO 9002, ISO 9001:2000 and ISO 14001. The remaining manufacturing facilities in Japan and Europe are certified to ISO 9000 and ISO 14001. Bandsaw blade Production at Ternitz/Austria has also integrate an enviromental management system in accordance with EMAS.

AMADA GROUP

COMPREHENSIVE MANUFACTURER OF METALWORKING MACHINERY

Established in 1946 by Mr Isamu AMADA, today's group is composed of 90 companies and subsidiaries all over the world. Their main businesses are the manufacture, sale, lease, repair, maintenance and inspection of metalworking machines and equipment.

Originally dedicated to the production of saws, its founder drove the company to innovate through the design and manufacture of bending machines. Seventy years later, with over 3100 patents, AMADA has more than 7900 employees. In that respect, Amada has turned out to be one of the worldwide leaders in this field of industry.

AMADA IN EUROPE

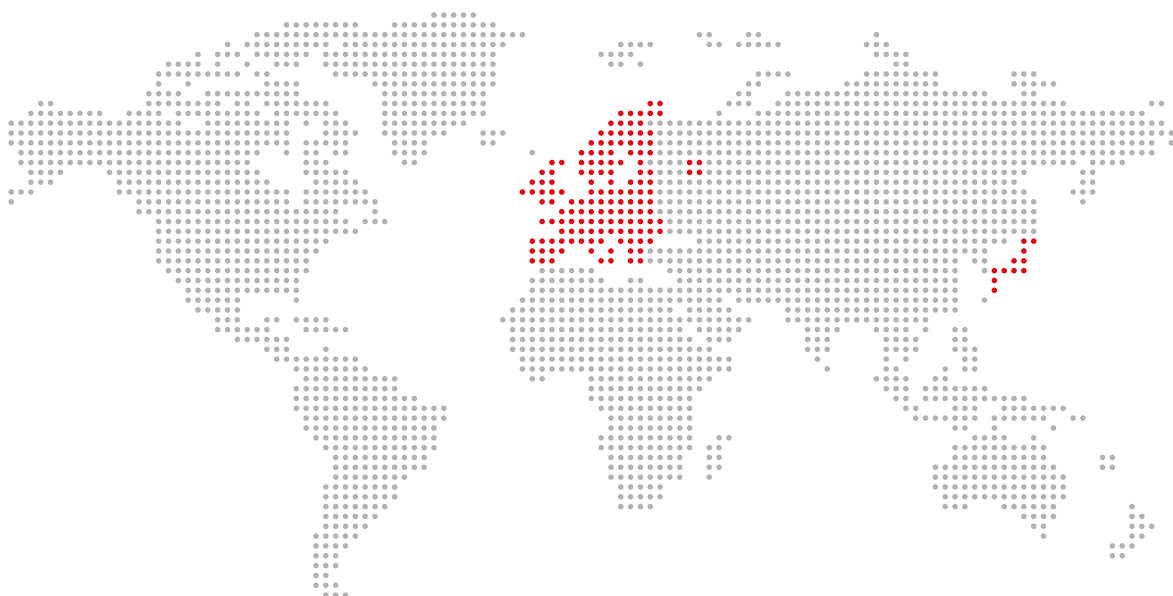

With 18 enterprises in 13 European countries and over 1,500 employees, AMADA aims to be the partner working side by side with its customers in Europe and will continue to grow in close co-operation towards the realisation of high profile customised technical solutions.

AMADA MACHINE TOOLS EUROPE

In order to further growth and to enforce the position in the important European market, AMADA MACHINE TOOLS EUROPE GmbH was established in October 2009.

Today AMADA MACHINE TOOLS EUROPE GmbH is responsible for the entire cutting machines, cutting tools, grinding machines and milling machines business at Europe, Russia, GUS and North Africa and provides sales, service, parts and support.

In addition to the headquarters in Haan (near Düsseldorf/Germany), the company has one branch in France, one branch in Italy and one office in Russia. Furthermore AMADA MACHINE TOOLS EUROPE GmbH has also an established network of local partners within the covered territory.
